

Summer Term:

As part of our Topic based learning for the summer term will be the Ancient Egyptians.

English:

This half term, children will do activities which include:

- Language-rich fiction and non-fiction texts
- Reflecting and thinking prompts
- Comprehension questions, including those demanding higher level skills
- Speaking and listening tasks, including reciting rhymes and poems and discussions
- Revision and practice for SPAG
- Free writing, including creative and imaginative writing
- Scaffolded writing, including poetry and different genres of non-fiction

This learning will take place across a range of genres, including:

- Fiction in written and oral story form
- Poetry in oral and written forms
- Explanations and Instructions
- Simple persuasive texts, such as advertisements
- Information texts and reports
- Recounts and chronological reports, such as diaries
- Letters

Science: Living Things and Habitats

In the summer term, children will explore a variety of ways to identify, sort, group and classify living things. They will learn how animals are split into 'vertebrates' and 'invertebrates' and begin to consider the differences between living things within these classifications. They will use and create classification keys to group, identify and name living things from the local habitat and beyond. Throughout this unit children will work scientifically by gathering, recording and presenting information in different ways.

Ancient Egypt:

This half term, the children will study about where and when the Ancient Egyptian civilisation was. They will find out about the past in the same way that archaeologists do, by looking carefully at pictures and artefacts, trying to make sense of them, and then research what others have found out. They will also consider the importance of the River Nile to Egypt.

Maths:

This half term children will study the following areas of maths:

Shape: Children will learn the properties of different shapes, including circles and triangles. They will learn to identify lines of symmetry, compare, classify and explore angles and the find perimeter and area of shapes .

Addition/Subtraction: Children will solidify their understanding of using column method to add and subtract using money.

Multiplication/Division: Children will be using grid method for multiplication and applying this knowledge to solve word problems.

Number: Children will consolidate their understanding of negative numbers and learn to read and write Roman numerals.
